MEMORANDUM FOR THE RECORD

SUBJECT: ISTS Library Support

1. Although I have not had an opportunity to discuss the ISTS Library support requirements with the staff, I believe that the following needs should be for planning purposes at this time.

a. Texts and reference books, such as manuals, etc.--about 30.

b. Periodicals relevant to ISTS methodologies--about 15.

2. This material should be shelved in the ISTS area to encourage staff members and students to become familiar with the changes in the state of the art through the professional literature. I believe that all the publications should be cataloged, etc., in the regular library system of the Agency to assure rapid availability to any interested in the field, preclude the development of redundant or uncomptable accounting, etc.
